

NEARME

Real-Time Proximity Social Discovery

CORE MECHANIC + SUBSCRIPTION & FEATURE SPECIFICATION

Developer Handoff Document | v2.0 | Confidential

Straight | Gay | Lesbian | Bisexual | All orientations | Global

1. The Core Mechanic — How NearMe Works

NearMe works differently from every existing dating app. There is no swipe. There is no match request. There is no waiting for acceptance. A user sees nearby people on a grid, taps a profile, and starts messaging immediately. Calls unlock the moment the other person replies.

⚠ This section is the single most important part of this document. Every developer on the team must understand this mechanic before writing a single line of code.

1.1 The Exact Conversation Flow

Who	Action	Result / State
Person A	Opens nearby grid	Sees profiles of people nearby right now
Person A	Taps any profile	Chat window opens immediately — no request, no acceptance needed
Person A	Sends messages	Unlimited messages. Person B receives them in real time
Person B	Reads messages	Person B sees everything. Can read, ignore, or block at any time
Person B	Does NOT reply	Chat stays open forever. Person A can keep messaging. Calls stay locked.
Person B	Replies for the first time	AUDIO CALL + VIDEO CALL both unlock instantly for both users
Either person	Initiates a call	Call connects — both sides can now call each other freely
Either person	Blocks at any time	Blocked user cannot message or call — block works immediately

if anyone blocks, chat and profile of both the person will disappear

1.2 The Golden Rule

Calls are NEVER available until Person B sends at least one reply. No exceptions. No paid override. No bypass.

✦ *This rule is what makes the system safe. It means a call can only happen when there is mutual interest — Person B chose to engage. The call button must not exist in the UI at all until this condition is met. It should not be greyed out. It should be invisible.*

call buttons can be visible , but not used until other person replies to message

1.3 What Happens Before the First Reply

- Person A can send unlimited messages — no daily cap within an open chat
- Person A on free tier: can open new chats with a limited number of different people per day (see Section 3 for limits)
- Person A on paid tiers: can open new chats with unlimited people per day
- Person B sees all messages. There is no message request screen — it goes directly to their inbox
- Read receipts: only subscribers can see the 'seen' status. Free users cannot see if their messages were read
- The audio call button is invisible in the UI — not greyed out, not locked, completely absent
- The video call button is invisible in the UI — same rule
- Person B can block Person A at any time from the first message — one tap, instant effect
- Person B can mute Person A (messages arrive but no notifications) at any time [Archive, Pin](#)
- If Person B ignores the chat forever, it stays in Person A's sent chat list indefinitely
- Person A can delete the chat from their side at any time

1.4 What Happens After the First Reply

- The moment Person B sends their first reply — both the audio call and video call buttons appear in the chat UI for both users
- Either person can initiate a call — not just Person A
- Call availability does not expire — once unlocked, stays unlocked unless one person blocks the other
- Normal chat continues alongside calls — the conversation does not reset
- Free users: video call limited to 2 minutes per day. Audio call limited to 5 minutes per day
- Paid users: unlimited call duration (see per-plan limits in Sections 4–7)

1.5 Why This Mechanic Works

- No swipe fatigue — users do not spend time swiping before interacting
- No waiting for a match — the conversation starts immediately, creating real-time energy
- Natural pacing — Person B decides when they are ready to engage, reducing pressure
- Calls as a reward — unlocking calls feels like a milestone, increasing motivation to reply
- Spam protection built in — a spammer sends mass messages but gets no calls because nobody replies
- Safety preserved — Person B always controls whether escalation (calls) happens

[phone number and face verification](#)

2. User Identity, Grid & Discovery

2.1 Onboarding — Required Fields

- Phone number (OTP verification — mandatory)
- First name and age
- ~~At least 1 profile photo (mandatory)~~ If they want, they can put image(optional)
- Gender identity: Man / Woman / Non-binary / Trans Man / Trans Woman / Genderqueer / Genderfluid / Other (free text)
- Sexual orientation: Straight / Gay / Lesbian / Bisexual / Queer / Pansexual / Other
- Who I want to see: Men / Women / Everyone / Non-binary people (multi-select)
- Relationship intent: Dating / Friendship / Networking / Open to anything

⚠ Gender identity and sexual orientation are stored separately. A user's grid visibility is based on WHO THEY WANT TO SEE and WHO WANTS TO SEE THEM — not assumptions from labels.

2.2 The Nearby Grid

- Grid layout — cards, not swipe stack
- Each card shows: photo, first name, age, distance, last-active status
- Sort order by default: active in last 10 minutes first, then nearest
- 'Live now' pulse icon on users active in the last 5 minutes
- Grid refreshes automatically every 3 minutes when app is in foreground
- ~~Users inactive for more than 4 hours are deprioritised to the bottom of the grid~~
- ~~Users inactive for more than 48 hours are hidden from the grid entirely~~ (but their profile and chats remain)
2 weeks

details of the profile, their need, whether they have place, where they can meet, online/poffline/ how much hrs before they were online, eigght, weight, skin colour, tags- their fantasy- safer sex, kissing, kink, roleplay, romancitic, daddy, mummy , sugar mom, sugar dad, beard,

about me section:

where they are from -south asia

status: single /committed/

what they are looking for: fwb, one night, long term, short term...

preferebces----what they are into

where we can meet: my place, urplace,...restaurant....

other person can shortlist , or star it

body type:

2.3 Orientation-Aware Grid Logic

- A straight man appears only in the grids of women who want to see men
- A gay man appears only in the grids of men who want to see men
- A lesbian woman appears only in the grids of women who want to see women
- A bisexual user appears in all matching grids by default — they can narrow this in filters
- A non-binary user chooses which grids they appear in via their 'who can discover me' setting
- Trans users: grid visibility follows their gender identity, not assigned-at-birth
- Orientation is NOT shown on profile cards in the grid by default — only shown in the full profile view, and only if the user has enabled 'show orientation publicly'

⚠ The grid algorithm must never rank users differently based on orientation or gender identity. Orientation determines WHICH grid a user appears in — never their rank within that grid.

2.4 LGBTQ+ Safety Defaults

- Discreet mode: the app icon can be changed to a neutral icon (calendar, weather) from Settings — for users in regions where their identity carries personal risk
- Outing protection: orientation and gender identity data is never exposed to other users without explicit user consent
- Anti-LGBTQ+ language in any message triggers immediate AI flag and human review within 2 hours
- Users can report a profile for anti-LGBTQ+ behaviour as a distinct category in the report flow

FREE PLAN

3. FREE Plan

20 different people / day, ----but they can see unlimited first image alone, not the entire profile

3.1 Messaging Limits

- Can open new chats with up to 10 different people per day
- Once a chat is open: unlimited messages to that person, no cap
- The ~~10~~ person daily limit resets at midnight local time 20
- Chats opened yesterday do not count against today's limit — only new chats started today
- No read receipts — Person A cannot see if their messages were read before a reply
- Cannot see if the other person is currently typing

3.2 Calls

- Audio call: available only after first reply — then limited to 5 minutes per day total
- Video call: available only after first reply — then limited to 2 minutes per day total
- Call timer shown on screen with upgrade prompt when limit is reached
- Call quality: standard (480p video, standard audio)

3.3 Grid & Discovery

- View up to 100 nearby profiles
- Basic filters: distance (up to 25 km), gender, orientation, intent
- Ads shown between grid refreshes and in the chat list

3.4 Profile

- Upload up to 4 photos 10 photos in album, like nude album they can send , 1 album is free , when they want multiple albums- paid
- Name, age, bio (max 150 characters)
- Show / hide distance toggle
- Show / hide active status toggle

3.5 Safety (All tiers — always free)

- Block — one tap, instant, permanent until unblocked
 - Mute — silences notifications from a person without blocking
 - Report — one tap, categories: harassment / fake profile / inappropriate photo / hate speech / spam / other
 - Panic hide — one tap hides your profile from the entire grid temporarily
 - AI photo moderation on upload — explicit content auto-rejected
 - AI text moderation — hate speech, slurs, explicit solicitation in messages flagged and reviewed
-

PREMIUM ₹399 / month

4. PREMIUM Plan

Everything in Free, plus:

4.1 Messaging

- Open new chats with unlimited people per day (vs 10 on Free)
- Read receipts — see when your messages were read, even before a reply
- Typing indicator — see when Person B is typing a response
- Save up to 5 message templates — send a saved opening quickly
- Unsend a message within 2 minutes of sending (if not yet read)
- Send up to 10 expiring photos per day in chat — disappear after the receiver views them

4.2 Calls (after first reply)

- Audio calls: unlimited duration [if we want, we can minimise](#)
- Video calls: unlimited duration
- Video quality: HD (720p)
- Background blur
- Front/back camera switch
- Mute / unmute, camera on/off
- Picture-in-picture — minimise the call while browsing the app
- Call history log

4.3 Grid & Discovery

- View up to 600 nearby profiles [chat with 100](#)
- Advanced filters: height, education, occupation, language, religion, drinking/smoking, relationship goal
- 'Verified users only' filter
- 'Active in last 30 minutes' filter
- No ads

4.4 Profile & Visibility

- Upload up to 8 photos
 - Extended bio (400 characters)
 - Voice intro clip: record up to 30 seconds — plays on profile
 - Video intro clip: upload up to 15 seconds — plays on profile
 - Premium badge shown on profile card
 - Higher grid ranking — Premium profiles appear above Free at the same distance
-

GOLD ₹799 / month

5. GOLD Plan

Everything in Premium, plus:

5.1 Messaging Enhancements

- Unsend messages even after they have been read
- Edit a sent message within 10 minutes of sending
- In-chat translation — messages auto-translated to your language in real time
- Pin up to 5 chats at the top of your inbox
- Unlimited expiring photos in chat

5.2 Calls (after first reply)

- Full HD video calls (1080p)
- Virtual backgrounds (system scenes)
- Low-bandwidth mode for slower connections
- Schedule a video call — send a calendar invite within the chat
- International call quality optimisation

5.3 Privacy Controls

- Incognito mode — browse the grid without appearing on anyone else's grid or triggering 'who viewed me'
- Hide your online / active status completely
- Hide last seen timestamp
- Hide exact distance — shows only 'Near you' or a fuzzy range

5.4 Profile Insights

- Who viewed my profile — full list with name, photo, and time
- Profile analytics: daily views, message reply rate, call unlock rate, grid rank
- View trends over 7 / 30 days

5.5 Travel & Explore Mode

- Set location to any city before you arrive — appear on that city's grid with a 'Visiting Soon' badge
- Browse and message users in any city globally without being there physically
- Save up to 3 city profiles and switch between them instantly

5.6 Grid & Discovery

- Unlimited nearby profiles — no cap
 - 'Active in last 5 minutes' filter
 - 'Recently joined' filter — new users in last 48 hours
 - 'High reply rate' filter — users who respond frequently
 - Custom distance radius: 0.5 km to 100 km
 - Verified badge (included — no extra charge)
-

PLATINUM ₹1,499 / month

6. PLATINUM Plan

Everything in Gold, plus maximum visibility and AI tools:

6.1 Maximum Grid Visibility

- Top position in nearby grid — Platinum profiles appear above all other tiers
- 5x algorithm boost: shown to significantly more nearby users per session
- Featured profile badge — distinct, premium visual identifier on your card
- When a new user opens the app in your area, you appear in their first visible screen
- Your messages appear at the top of the recipient's inbox (vs chronological order for other tiers)

6.2 AI Features — All opt-in, can be disabled in Settings

- AI Profile Optimizer:
 - Scans bio and suggests rewrites to improve reply rates
 - Rates your photos and recommends the best primary photo
 - Profile health score with specific, actionable tips
- AI Icebreaker Suggestions:
 - Before sending your first message, AI suggests 3 personalised openers based on the receiver's profile
 - References their bio, interests, or distance — never generic
 - You always edit and send — AI never sends on your behalf
- AI Conversation Assistant:
 - Suggests reply options in active chats — shown as chips below the text box
 - Helps re-engage a quiet conversation with a relevant prompt
 - Auto-translates and suggests culturally appropriate replies for international chats
- AI Matching Engine:
 - Compatibility score shown on each profile card (0–100, based on intent, interests, and response patterns)
 - Daily Top 10 — AI-curated list of your most compatible nearby users today
 - Second Chance — resurfaces profiles you scrolled past that the AI thinks are a strong match
- Smart Inbox:
 - AI sorts your incoming chats: most likely to lead to a reply shown first
 - Separates high-quality conversations from low-effort ones into tabs

6.3 AI Analytics

- Best time to send messages — based on when your target audience is most active
- Reply probability score shown before you open a new chat
- Weekly performance report: reply rate, call unlock rate, conversation quality score
- 'What is working' and 'What to improve' — specific, data-driven tips

6.4 Calls (after first reply)

- AI noise cancellation — eliminates background noise
- AI virtual backgrounds — full scene replacement, not just blur
- Premium video effects — lighting enhancement, sharpening
- Priority call routing — lower latency

6.5 Concierge & Exclusive

- Dedicated support with target 4-hour response time
 - Early access to new features before public launch
 - Beta tester programme
 - Account recovery priority
-

7. Pricing Table

Plan	Monthly	3 Months	6 Months	Annual	Save
FREE	₹0	₹0	₹0	₹0	-
PREMIUM	₹399	₹999	₹1,799	₹2,999	Save 37%
GOLD	₹799	₹1,999	₹3,499	₹5,999	Save 37%
PLATINUM	₹1,499	₹3,799	₹6,799	₹11,499	Save 36%

- ◆ India users convert significantly better on weekly and monthly plans. Consider adding a ₹99–₹199 weekly option for Premium as a low-friction entry point.
 - ◆ Women may be offered a free 7-day Premium trial at signup to improve female retention and grid quality for all users.
-

8. Feature Comparison Matrix

⚠️  = included |  = not included | Paid = available as one-time purchase | After reply = only available after Person B replies

Messaging

Feature	FREE	PREMIUM	GOLD	PLATINUM
New chats per day (different people)	10 / day	Unlimited	Unlimited	Unlimited

9. One-Time Purchases & Add-Ons

Available to all tiers. These are your highest-conversion revenue moments — design them to feel like power-ups, not paywalls.

Add-On	Price	Duration	What It Does
Boost — Local	₹49	30 min	Appear at the top of the nearby grid for 30 minutes within your current distance radius.
Boost — Extended	₹99	30 min	Top of grid with an expanded radius — visible to more people further away.
Boost — City-Wide	₹199	30 min	Top of the entire city grid for 30 minutes. Best for evenings and weekends.
Mega Boost	₹499	1 hour	City-wide top placement for 1 full hour. Maximum exposure for events, parties, or launches.
Spotlight	₹199	24 hours	Your profile appears in a 'Featured Nearby' carousel on the home grid for 24 hours.
New Chat Pack — S	₹79	5 extra	Unlock 5 additional new chat slots for today, on top of your daily free limit. Free tier only.
New Chat Pack — M	₹149	15 extra	Unlock 15 additional new chat slots. For active free users.
New Chat Pack — L	₹249	35 extra	Unlock 35 additional new chats. Best value for high-activity days.
Travel Pass	₹99	24 hours	Travel mode for Free and Premium users. Set any destination city for 24 hours.
Travel Pass — Week	₹299	7 days	Full travel mode for 7 days. Explore any city before you arrive.
Verified Badge	₹199	Permanent	Blue verified tick via selfie + ID check. Permanently shown. Increases reply rates significantly.
Audio Call Top-Up	₹49	30 min	Add 30 extra minutes of audio calling for the month. Free tier only.
Video Call Top-Up	₹79	30 min	Add 30 extra minutes of video calling for the month. Free tier only.

◆ *New Chat Packs are your most important Free-tier monetisation. A free user who hits their 10-person daily limit and is actively enjoying the app is the highest-intent purchase moment in the product.*

10. Safety System

⚠ Safety directly determines female retention and LGBTQ+ retention. Both are essential to the health of the network. Build all of the following in V1 — none of it is optional.

10.1 Pre-Reply Safety (The Most Important Window)

The period before Person B replies is where harassment risk is highest. These rules must all be enforced server-side.

- Audio and video call buttons are completely absent from the UI — not greyed out, not locked — until first reply
- Person B can block Person A from the very first message — one tap, no confirmation screen needed
- Person B can mute Person A — messages arrive silently, no notifications
- AI text moderation scans every outgoing message for: explicit sexual content, threats, hate speech, anti-LGBTQ+ slurs — flag and auto-hide pending human review
- If Person A's messages are ignored by more than 80% of recipients over a 7-day period: warning issued and daily new-chat limit reduced by 50% for 7 days
- Repeat offender rules: 3 confirmed harassment reports → 30-day restriction. 5 confirmed → permanent ban

10.2 Call Safety

- Calls only unlock after first reply — this rule cannot be bypassed at any price or tier
- Incoming call screen always shows the caller's name and photo — cannot be bypassed
- One-tap end call + instant report and block from within the call
- 3 consecutive declined calls to the same person in one day → that person is blocked from calling for 24 hours
- AI nudity detection on video streams — flag, warn, then auto-end call if confirmed
- Screenshot notification in video call — other party is notified

10.3 Identity & Trust

- Mandatory phone OTP at signup
- Verified badge: selfie + government ID via third-party provider (DigiLocker for India, Stripe Identity for global)
- College verification: .edu email or student ID → 'College Verified' badge
- AI photo moderation on every uploaded photo — explicit content auto-rejected before appearing on grid
- Profile completeness score — profiles with photo, bio, and verified status rank higher in grid

10.4 Women's Safety Defaults

- 'Verified users only' filter — ON by default for all women at signup (can be turned off)
- 'Pause incoming messages' — one tap stops all new people from starting a chat (existing chats unaffected)
- Fuzzy distance option: show only 'Near you' rather than an exact number
- Require profile completeness: optionally only receive messages from users who have a bio and at least 2 photos

10.5 LGBTQ+ Specific Safety

- Discreet mode: app icon replaceable with a neutral icon from Settings
 - Outing protection: orientation and gender identity never shown to other users without explicit opt-in from the user
 - 'Show orientation publicly' is OFF by default — shared only in accepted chats unless user turns it on
 - Anti-LGBTQ+ language triggers immediate flag + human review within 2 hours
 - Separate report category: 'LGBTQ+ hate or discrimination'
 - Orientation data is NEVER sold, shared with advertisers, or included in analytics exports
-

11. Technical Specification for Developers

11.1 Recommended Stack

- Frontend: React Native (single codebase iOS + Android)
- Backend: Node.js + NestJS
- Realtime messaging + presence: Supabase Realtime or Firebase RTDB
- Geolocation & grid: Google Maps Platform (Geofencing + Places APIs)
- Video & audio calling: Agora SDK or 100ms — do NOT build this infrastructure yourself
- AI features: Anthropic Claude API or OpenAI GPT-4o — use APIs, no custom model training in V1
- Image moderation: AWS Rekognition or Google Cloud Vision API
- Push notifications: Firebase Cloud Messaging
- Payments: Razorpay (India), Stripe (global)
- Identity verification: DigiLocker (India), Stripe Identity (global)

11.2 Critical Business Logic — Enforce Server-Side

- Call unlock state: stored server-side per chat. Set to TRUE the moment Person B sends their first reply. Client reads this state — never calculates it locally.
- New chat daily limit: tracked server-side per user per UTC day. Client cannot bypass. Enforce on the 'open new chat' API endpoint.
- Free tier call time limits: tracked in minutes server-side. Deduct in real time during call. End call server-side when limit reached — do not rely on client timer.
- Block: applied server-side immediately. Blocked user is removed from the blocker's grid, cannot send messages, cannot initiate calls. Both users' active chats are hidden.

11.3 Call Unlock — UI Logic

- Before first reply: the call buttons do not exist in the DOM/component tree. They are not rendered at all. This prevents any client-side bypass.
- After first reply: a server event (websocket) notifies both clients to re-render the chat view with call buttons now included.
- Call buttons: audio call button (phone icon) and video call button (camera icon) appear together at the top of the active chat.
- Never show a 'locked' or 'greyed out' call icon before the first reply. This creates false expectations and confusion.

11.4 Grid Ranking Algorithm — Priority Order

- 1st: Currently boosted (active Boost add-on)
- 2nd: Platinum subscribers
- 3rd: Gold subscribers
- 4th: Premium subscribers
- 5th: Active in last 5 minutes
- 6th: Active in last 30 minutes
- 7th: Distance (nearest first)
- 8th: Profile completeness score
- 9th: Historical reply rate (rewards responsive users)

⚠ Ranking must never differentiate by gender identity or sexual orientation. Orientation determines which grid a user appears in — not their rank within it.

11.5 Location & Privacy

- Location updated every 3 minutes while app is in foreground
- Location updates paused in background (battery + privacy)

- Exact coordinates are never exposed to other users — only a distance value (e.g. '0.8 km') or fuzzy range for Gold+
 - All user data encrypted at rest (AES-256) and in transit (TLS 1.3 minimum)
 - GDPR (EU), India Digital Personal Data Protection Act, and local privacy laws must be reviewed before entering each new market
-

12. V1 Launch Checklist

⚠ Ship this and only this. Every feature not on this list is V2 or later.

Must Ship — Launch Blockers

- OTP registration and profile setup (photo, name, age, orientation, intent)
- Nearby grid with orientation-aware filtering
- Open chat immediately on profile tap — no request screen
- Unlimited messages in an open chat
- New chat daily limit: 10 for free, unlimited for paid (server-side)
- Read receipts — subscribers only
- Call unlock on first reply — server-side state, UI renders call buttons only after unlock
- Audio call: 5 min/day free, unlimited paid
- Video call: 2 min/day free, unlimited paid
- Block (one tap, instant)
- Mute (one tap)
- Report (one tap, categories)
- Panic hide
- AI photo moderation on uploads
- AI text moderation on outgoing messages
- All 4 subscription tiers with payment integration (Razorpay + Stripe)
- Boost add-on (Local, Extended, City-Wide)
- New Chat Pack add-ons (S, M, L)
- Verified Badge add-on
- Incognito mode (Gold+)
- Who viewed me (Gold+)
- Travel mode (Gold+)
- Discreet app icon (LGBTQ+ safety feature — all tiers)

Ship if Time Allows

- Voice and video intro clips on profile
- Event mode (Gold+)
- AI icebreakers (Platinum)
- Profile analytics dashboard (Gold+)
- Smart Inbox (Platinum)

Defer to V2 — Do Not Build Now

- Audio rooms and speed dating
 - Stories or Reels content
 - Background checks
 - Community boards
 - Couple mode
 - Virtual gifts
 - AI matching score (too complex for V1 — add once you have real engagement data)
-
